

Application for Installation of an Underground Electric System

This application is for installation of an underground electric system in a residential or commercial subdivision.

This form must be completed by the Developer and returned to Connexus Energy before the design of the electric system can proceed. Developer further agrees to provide the requirements to its engineers and contractors in order to avoid delays or additional costs during the installation of the infrastructure.

Please provide the following information for the planned residential or commercial development:

1. Site Information:

Subdivision Name: _____

Subdivision Location (City, County & Zip Code): _____

Name of the Owner/Developer: _____

Mailing Address: _____

Phone: _____

Email: _____

Development Type: Residential Development Commercial Development

Structure Type: Single Family Town Home Other _____

City Water: Yes No

City Sewer: Yes No

Number of Lots: _____ Number of Blocks: _____

Avg. House Size (Sq. Ft.): _____ Avg. A/C tons/unit: _____

Other Electrical Loads: _____

2. Is the subdivision going to be constructed in phases? Yes No

If yes, please attach a copy of the overall development plan including all proposed phases.

3. Is equipment being installed that requires three phase power? Yes No

If yes, please attach a detailed description of the specific power requirements for each load, include the type of the electrical load, motor horsepower, locked rotor current, full load current, voltage, and location within the development.

4. Will there be a power requirement for amenities such as motor-operated gates, public use areas, signage, monuments, irrigation or landscape? Yes No

If yes, please attach a detailed description of the specific power requirements and the locations within the subdivision.

5. Is the developer proposing to install street lights in the subdivision? Yes No

If yes, the Developer is responsible for obtaining city approved light locations.

6. Please attach copies of the following documentation or mark "N/A" if not applicable:

- a. Overall development plan or sketch plat showing all proposed phases. N/A
- b. Timeline for constructions – including all phases (if applicable). N/A
- c. Approved preliminary plat of subdivision, including water, sewer, or other underground utility lines. N/A
- d. If three-phase power is required, detailed description of the specific power requirements, include the type of the electrical load, motor size, voltage, and location. N/A
- e. If there are other service requirements for amenities such as motor-operated gates, public use areas, etc., please provide a load description and location for each service. N/A
- f. Water, Sewer, and Storm Sewer plans. N/A

By signing below, I acknowledge I **have read and understand the General Terms and Conditions of Service**. I also understand that my development will not be scheduled until I have made all necessary payments, completed the Developers Guide for Plat Construction readiness, and Connexus Energy has applied for and received all necessary permits.
